SCALE IN NAUTICAL MILES

A graph showing the relationship between Latitude (Y-axis) and Nautical Miles (X-axis). The Y-axis is labeled 'LATITUDE' and has markings for EQ, 20N, 40N, and 60N. The X-axis is labeled 'NAUTICAL MILES' and has markings from 0 to 600 in increments of 100. Five curves are plotted, representing distances of 100, 200, 300, 400, and 500 nautical miles. The curves show that for a given distance, the latitude increases as the distance increases, and for a given latitude, the distance increases as the latitude increases.
