SCALE IN NAUTICAL MILES

A line graph showing the relationship between Latitude and Nautical Miles for the 1000 fms isotherm. The Y-axis is labeled 'LATITUDE' and ranges from EQ (Equator) to 60N, with major ticks at 20N, 40N, and 60N. The X-axis is labeled 'NAUTICAL MILES' and ranges from 0 to 600, with major ticks every 100 miles. Five curves are plotted, each representing a different month. The curves are roughly parallel and slope downwards from left to right. The leftmost curve (January) starts at approximately 65N at 0 miles and reaches EQ at about 100 miles. The rightmost curve (July) starts at approximately 65N at 0 miles and reaches EQ at about 600 miles.
