SCALE IN NAUTICAL MILES

A graph showing the relationship between Latitude (Y-axis, from EQ to 60N) and Nautical Miles (X-axis, from 0 to 600). Five curves are plotted, representing different magnetic declinations. The curves are labeled with their respective declination values: 10°E, 15°E, 20°E, 25°E, and 30°E. The curves show that for a given latitude, the distance in nautical miles increases as the magnetic declination increases.
