SCALE IN NAUTICAL MILES

The graph illustrates the relationship between Latitude and Nautical Miles. The Y-axis represents Latitude, with markings for EQ (Equator), 20N, 40N, and 60N. The X-axis represents Nautical Miles, ranging from 0 to 600. Five curves are plotted, each corresponding to a specific latitude: 60N, 50N, 40N, 30N, and 20N. The curves show that the distance in nautical miles increases as the latitude decreases.
