SCALE IN NAUTICAL MILES

A graph showing the relationship between Latitude (Y-axis) and Nautical Miles (X-axis). The Y-axis is labeled 'LATITUDE' and has markings for EQ, 20N, 40N, and 60N. The X-axis is labeled 'NAUTICAL MILES' and has markings from 0 to 600 in increments of 100. Five curves are plotted, representing distances of 100, 200, 300, 400, and 500 nautical miles. The curves show that for a given distance, the latitude increases as the distance from the equator increases, and the rate of increase is greater for larger distances.

DEVELOPING LOW
1002 hPa
35N 144E
EAST 20 KT
EXPECTED WINDS 30 TO 50 KT
WITHIN 800 NM OF LOW E-SEMICIRCLE
AND 500 NM ELSEWHERE
WITHIN NEXT 24 HOURS
