FORMATION EXPECTED

SCALE IN NAUTICAL MILES

A graph showing the relationship between Latitude (Y-axis) and Nautical Miles (X-axis). The Y-axis is labeled 'LATITUDE' and ranges from EQ (Equator) to 60N. The X-axis is labeled 'NAUTICAL MILES' and ranges from 0 to 600. Five curves are plotted, representing distances of 100, 200, 300, 400, and 500 nautical miles. The curves show that for a given distance, the latitude increases as the distance from the equator increases, and the rate of increase is higher for shorter distances.
